20. ABSTRACT

The ARI Survey of Army Recruits (more commonly known as the New Recruits Survey [NRS]) is conducted to obtain information on the characteristics, enlistment motivations, attitudes, and knowledge of recruits at the point of their initial entry into the U.S. Army. The eleven reports in the 1984 series include user's manuals, codebooks (which focus on data file documentation, including special variables, and use of the survey data available from respondents), and tables of survey results. They are:

- RN 86-46. The 1984 ARI Survey of Army Recruits:  
User's Manual.
- RN 86-47. The 1984 ARI Survey of Army Recruits:  
User's Manual for October 84 / February 85 Administration.
- RN 86-42. The 1984 ARI Survey of Army Recruits:  
Codebook for Summer 84 Active Army Survey Respondents.
- RN 86-43. The 1984 ARI Survey of Army Recruits:  
Codebook for Summer 1984 USAR & ARNG Survey Respondents.
- RN 86-44. The 1984 ARI Survey of Army Recruits:  
Codebook for October 84 / February 85 Active Army Survey Respondents.
- RN 86-45. The 1984 ARI Survey of Army Recruits:  
Codebook for October 84 / February 85 USAR & ARNG Survey Respondents.
- RP 86-09. The 1984 ARI Survey of Army Recruits:  
Tabular Description of NRS (Active) Army Accessions, Volume 1.
- RP 86-10. The 1984 ARI Survey of Army Recruits:  
Tabular Description of NRS (Active) Army Accessions, Volume 2.
- RP 86-11. The 1984 ARI Survey of Army Recruits:  
Tabular Description of NRS Army National Guard Accessions.
- RP 86-12. The 1984 ARI Survey of Army Recruits:  
Tabular Description of NRS Army Reserve Accessions, Volume 1.
- RP 86-13. The 1984 ARI Survey of Army Recruits:  
Tabular Description of NRS Army Reserve Accessions, Volume 2.

A comparison of the methodologies used in the 1984 and 1985 administration of the NRS, together with recommendations for future surveys, appears in:

- TR 706. The 1984 and 1985 ARI Survey of Army Recruits:  
Methodology and Recommendations for Future Administration.

Reports based on the 1982 and 1983 administration of the NRS are also available.

THE 1984 ARI SURVEY OF ARMY RECRUITS:  
CODEBOOK FOR OCTOBER 84/FEBRUARY 85  
ACTIVE ARMY SURVEY RESPONDENTS

Jeanna F. Celeste  
Vivian F. Ramsey

This project was sponsored by the Directorate of Program Analysis and Evaluation, U.S. Army Recruiting Command, Office of the Deputy Chief of Staff for Personnel. The U.S. Army Recruiting Command provided funding for the database preparation and tabular descriptions produced under Contract No. MDA903-84-C-0446, expiring 30 September 1986. Westat, Inc. has been the contractor for this effort with Veronica Nieva and Jeanna Celeste serving, respectively, as Principal Investigator and Project Director.

Westat Project Staff:

Jeanna F. Celeste, Jansen B. Davis, Dorrit C. Garver,  
Veronica F. Nieva, Vivian F. Ramsey, Carin N. Rauch,  
Michael D. Rhoads, Reina C. Sprankle, Mark M. Waksberg  
Michael J. Wilson.

The U.S. Army Research Institute provided funding and personnel for research planning, survey design and administration, as well as personnel for the technical monitoring of the contract and construction of the databases.

ARI Project Staff:

Timothy W. Elig, Rebecca M. Pliske, Allyn Hertzbach,  
Michael E. Benedict, Sandra E. Parham, Victoria Peacock.

## ACKNOWLEDGEMENTS

---

Westat wishes to acknowledge the support of the many people who played various important roles in database construction, the data entry, and documentation of the 1984 Winter Survey of Active Army Recruits. We especially appreciate all the assistance provided by the U.S. Army Recruiting Command. They are commended for their cooperation in problem resolution, steadfast support, and continued interest in this work.

We gratefully acknowledge that this survey effort could not have succeeded without the cooperation of personnel at the U.S. Army Reception Stations. They voluntarily administered the survey, working survey operations into their already hectic schedules for processing new recruits.

THE 1984 ARI SURVEY OF ARMY RECRUITS:  
CODEBOOK FOR OCTOBER 84/FEBRUARY 85  
ACTIVE ARMY SURVEY RESPONDENTS

EXECUTIVE SUMMARY

---

Requirement:

To obtain information on the characteristics, enlistment motivations, attitudes and knowledge of recruits at the point of initial entry into the Army.

Procedures:

The Winter 1984 New Recruits Survey (NRS) is the fifth in a series of recruit surveys administered by ARI, and is the second administration of the 1984 instrument. The survey instrument is an expanded version of the 1983 ARI survey incorporating new questions on preenlistment conditions.

Data were collected by ARI in group settings during initial recruit processing at all eight Army Reception Stations in October 1984 and February 1985. Reception Station personnel were responsible for scheduling and supervising survey administration, guided by instructions prepared by ARI. The NRS was self-administered and recruits were directed to indicate their responses on optical scanning forms.

Four forms of the NRS were administered to recruits. Forms A, B, and C were administered to Regular Army recruits, and Form D was given to National Guard and Army Reserve recruits. Regular Army recruits had an equal chance of receiving any one of the three forms.

Westat, Inc. was then contracted for database construction, documentation, and tabular analysis. The survey answer sheets were optically scanned and recorded exactly as marked. Survey data were then edited and coded. A supplementary user's manual, codebooks, and a report on the survey methodology, "lessons learned," and recommendations were produced.

### Results:

A total of 4,814 Army recruits completed the 1984 Winter NRS. Of these, based upon Army personnel records, 4,482 had no prior military service and 91 had prior service experience (the status for the remaining 241 was not ascertained). The sampling plan employed imposes some restrictions on the generalizability of survey results to the population of Army accessions during FY 85. However, overall the survey effort was successful in obtaining updated information regarding new recruits.

### Utilization:

ARI Surveys of Army Recruits provide information to Army personnel planners about the quantity and quality of recruits entering the Army. In particular, information regarding the characteristics, knowledge of enlistment options, and enlistment motivations of new recruits enables Army personnel planners to be cognizant of present enlistment trends. Awareness of these trends is vital, in turn, for preparing for future manpower requirements. The Winter 1984 New Recruit Survey will also help provide information on seasonality effects in Army accessions.

THE 1984 ARI SURVEY OF ARMY RECRUITS:  
CODEBOOK FOR OCTOBER 84/FEBRUARY 85 ACTIVE ARMY  
SURVEY RESPONDENTS

INTRODUCTION

The purpose of this codebook is to provide documentation for users of the data collected by the 1984 Winter administration of the ARI Survey of Army Recruits, or as it is more commonly known, The ARI New Recruits Survey (NRS). This is one of two codebooks developed to document the 1984 Winter NRS data. Each codebook pertains to a particular Army service component, either Regular Active Army (RA), or the U.S. Army Reserve and Army National Guard (USAR/ARNG):

- Westat, Inc. (1986, May). The 1984 ARI Survey of Army Recruits: Codebook for October 84/February 85 Active Army Survey Respondents (Research Note 86-44). Alexandria, VA: US Army Research Institute for the Behavioral and Social Sciences.
- Westat, Inc. (1986, May). The 1984 ARI Survey of Army Recruits: Codebook for October 84/February 85 USAR & ARNG Survey Respondents (Research Note 86-45). Alexandria, VA: US Army Research Institute for the Behavioral and Social Sciences.

This is one of twelve reports produced to document the approach, data, and results obtained from the 1984 Summer and Winter administrations of the NRS. Codebooks similar to those produced for the 1984 Winter administration of the NRS were also developed to document data obtained in the 1984 Summer NRS:

- Westat, Inc. (1986, May). The 1984 ARI Survey of Army Recruits: Codebook for Summer 84 Active Army Survey Respondents (Research Note 86-42). Alexandria, VA: US Army Research Institute for the Behavioral and Social Sciences.
- Westat, Inc. (1986, May). The 1984 ARI Survey of Army Recruits: Codebook for Summer 84 USAR & ARNG Survey Respondents (Research Note 86-43). Alexandria, VA: US Army Research Institute for the Behavioral and Social Sciences.

Readers desiring greater detail regarding the Winter administration are referred to The 1984 ARI Survey of Army Recruits: Supplementary User's Manual for October 84/February 85 Administration. As the name implies, the supplementary user's manual provides specific information about the 1984 Winter NRS, but

complements the more complete (1984) user's manual, The 1984 ARI Survey of Army Recruits: User's Manual. Readers interested in learning about the 1984 NRS in its entirety are advised to consult this latter document.

An additional report is available presenting a comparison of the methodologies used in the 1984 and 1985 administrations of the NRS, and recommendations for future surveys. This report is entitled: The 1984 and 1985 ARI Survey of Army Recruits: Methodology and Recommendations for Future Administrations. Other reports are available which document survey administrations in 1982, 1983, and 1985.

The codebooks focus on data file documentation and use of the data, while the user's manuals provide more detail regarding survey instrument development, survey administration procedures, and data quality assessments. Preliminary results for the 1984 Summer NRS are reported in separate volumes containing crosstabulations of the survey items by selected demographic and service-related characteristics. These reports include the following:

- Westat, Inc. (1986, May). The 1984 ARI Survey of Army Recruits: Tabular Description of NPS (Active) Army Accessions, Volume 1 (Research Product 86-09). Alexandria, VA: US Army Research Institute for the Behavioral and Social Sciences.
- Westat, Inc. (1986, May). The 1984 ARI Survey of Army Recruits: Tabular Description of NPS (Active) Army Accessions, Volume 2 (Research Product 86-10). Alexandria, VA: US Army Research Institute for the Behavioral and Social Sciences.
- Westat, Inc. (1986, May). The 1984 ARI Survey of Army Recruits: Tabular Description of NPS Army National Guard Accessions (Research Product 86-11). Alexandria, VA: US Army Research Institute for the Behavioral and Social Sciences.
- Westat, Inc. (1986, May). The 1984 ARI Survey of Army Recruits: Tabular Description of NPS Army Reserve Accessions, Volume 1 (Research Product 86-12). Alexandria, VA: US Army Research Institute for the Behavioral and Social Sciences.
- Westat, Inc. (1986, May). The 1984 ARI Survey of Army Recruits: Tabular Description of NPS Army Reserve Accessions, Volume 2 (Research Product 86-13). Alexandria, VA: US Army Research Institute for the Behavioral and Social Sciences.

Volume 1 in each set of tabular descriptions for the RA and USAR components presents tables of NRS items crossed by five different respondent demographics such as gender, ethnic/racial group, highest education level achieved, and marital status. Volume 2 contains five service-related characteristics, such as recruiting brigade, age at contract signing or accession, and term of enlistment crossed with NRS items. The actual crossing variables vary somewhat across components. Due to insufficient personnel data, the ARNG has only one volume of tabular descriptions, comprised of NRS items crossed by a mix of three respondent demographics and two service-related characteristics.

No comparable tabular volumes are available for the October 84/February 85 survey administrations. The same crossing variables and recoded survey items produced for the 1984 Summer database were also constructed for the 1984 Winter database. Thus, data analysts can easily produce tables comparable to the Summer 1984 tabulation volumes using 1984 Winter data.

The primary audience for this codebook is expected to consist of researchers interested in performing analyses using the 1984 Winter NRS data files for the RA component. It is suggested that the reader review both user's manuals before beginning work with this volume in order to gain familiarity with the survey content, survey administration procedures, and database construction.

### Organization of the Codebook

This report contains an overview of the 1984 NRS and several chapters designed to aid data analysts in the use of the 1984 Winter NRS codebook for the RA component. The document also contains codebook entries and variable counts for each item contained on survey Forms A, B, and C (the RA instruments) as well as other variables included on the survey database. The four chapters of this report are thus of two major types: (1) narrative discussions covering introduction of the report, and 1984 NRS project overview, how to use this volume, special variable selection and creation procedures, and a codebook index; and (2) The 1984 Codebook for October 84/February 85 Active Army Survey Respondents.

The first chapter of the codebook introduces the report within the context of the three-volume series of reports produced to document The 1984 ARI Survey of Army Recruits. The Introduction also discusses the many reports documenting the 1984 Summer NRS. The structure and organization of the codebook is described followed by a brief overview of the 1984 NRS.

The second chapter is a guide to the interpretation of codebook entries. This section explains how to read the codebook pages, provides codebook conventions, and explains how to use the codebook index.

The third chapter documents special variables selected or created for inclusion on the 1984 Winter NRS RA data file which were not original survey items. The discussion encompasses:

- The development of variables documenting the number of response categories selected in serial list questions;
- The creation of variables to check both the internal consistency of respondents' answers within serial list questions and across related survey items;
- The creation of variables to calculate the frequency of response errors;
- The procedures used to create recoded versions of survey items for use in tabular analyses;
- The selection of data elements from Army personnel records; and
- The development of crossing variables which are made available for analysts who wish to produce cross-tabulations of the Winter data.

In addition to explaining variable selection and creation procedures, this final chapter contains tables documenting the transformation of original survey items and Army data elements into recoded versions of the variables.

Included in this section is an index which can be used as a table of contents for locating variables in the 1984 Winter NRS Codebook for the RA component.

The final chapter in this volume is a codebook documenting the data files produced for the 1984 Winter NRS for the RA component. One version of the survey data files was produced using the Statistical Analysis System (SAS). The survey data were also produced in Operating System (OS)<sup>1</sup> format. The SAS and OS files contain: (1) survey responses; (2) data elements merged onto the survey file from the Operations Reporting Master File (ORMF); (3) variables created during the data editing stage; and (4) recoded survey items and crossing variables created for use in the tabulation volumes.

---

<sup>1</sup>The OS data file was designed to make the survey data accessible on any IBM-compatible computer system.

The codebook documents the data file by providing the location of variables, labels for both variables and values, response frequencies, survey item crosswalks across the four versions of the 1984 instruments and the Enlistment Decision Survey (MEPS/MEPS Followup Survey) instruments, and an indicator of survey item presentation and wording consistency across previous NRS administrations.

### Project Overview

The ARI Surveys of Army Recruits, commonly known as the ARI New Recruits Surveys (NRS), are conducted on a regular basis to provide updated information on the characteristics, knowledge of enlistment options, and enlistment motivations of recruits at the point of their initial entry into service. Military personnel planners require such information on a regular basis to monitor current recruiting strategies and to forecast future enlistment trends.

The NRS were begun in 1982. Expanded versions of the original surveys were administered in the Summer of 1983 and Winter of 1984. Further revisions and expansions were made to the 1983 instruments for administration in the Summer of 1984 and Fall/Winter of FY 85. In addition to the ability to track changes in recruits from year to year, this series of surveys offers the Army an opportunity to gather new information in each year of the survey.

The 1982 and 1983 surveys were directly commissioned by the Deputy Chief of Staff for Personnel. The 1984 and 1985 NRS were sponsored by the U.S. Army Recruiting Command and were undertaken with the continuing interest of the Deputy Chief of Staff for Personnel. While the sponsorship, specific questions, and interests may change from year to year, the charter for these surveys remains the same. The four main research requirements have been to determine: (1) the demographic composition of entering recruits; (2) how to target recruiting resources to attract high quality recruits; (3) new recruits' enlistment motivations and propensity for remaining in service; and (4) which recruiting and advertising practices are proving the most successful and why.

The 1984 Summer and Fall/Winter NRS are, respectively, the fourth and fifth in the series of recruit surveys conducted by ARI. Survey data were collected in group settings during initial recruit processing at all eight Army Reception Stations during June, July, and August of 1984, and again in October 1984 and February 1985. Reception Station personnel were responsible for scheduling and supervising survey administration, guided by instructions prepared by ARI. The NRS was self-administered and recruits were directed to indicate their responses on optical scanning forms.

Four forms of the NRS were administered to recruits. Forms A, B, and C were administered to Regular Army recruits, and Form D was given to National Guard and Army Reserve recruits. Regular Army recruits had an equal chance of receiving any one of the three forms.

A total of 15,309 Army recruits completed the 1984 NRS. The majority, 10,495, of these recruits were surveyed during the Summer administration, and 4,814 completed surveys during the Fall/Winter 1984 NRS. The surveys were distributed across components as follows:

<u>Summer</u>		<u>Fall/Winter</u>	
<u>RA</u>	<u>USAR/ARNG</u>	<u>RA</u>	<u>USAR/ARNG</u>
6,184	4,311	3,524	1,290

The survey answer sheets were optically scanned and recorded exactly as marked. Survey data were then edited and coded. User's manuals, codebooks, tabulation volumes, and a report comparing the 1984 and 1985 survey methodologies, "lessons learned," and recommendations were produced.

The sampling plan employed in the NRS-84 imposes some restrictions on the generalizability of survey results to the population of FY 84 and FY 85 Army accessions. However, overall the survey effort was successful in obtaining updated information regarding new recruits.

The 1984 ARI Survey of Army Recruits provides information to Army personnel planners about the quantity and quality of recruits entering the Army. In particular, information regarding the characteristics, knowledge of enlistment options, and enlistment motivations of new recruits enables Army personnel planners to be cognizant of present enlistment trends. Awareness of these trends is vital, in turn, for preparing for future manpower requirements.

## HOW TO USE THIS VOLUME

The purpose of this chapter is to provide assistance in reading the 1984 Winter NRS Codebook and performing data analysis. The first section in this chapter briefly reviews the codebook composition. The next sections provide:

- Notations of conventions followed in the development of the codebook, such as order of variable presentation, and variable naming conventions;
- Examples of the different variable presentation formats used in the codebook;
- A table crosswalking the SAS special value codes to OS format; and
- A discussion of the use of the codebook index to locate entries for specific survey items.

### Codebook Composition

The purpose of the 1984 Winter NRS Codebook is to document the SAS and OS survey data files produced. The codebook documents all variables produced on the data files including: survey responses, Army personnel data (MEPRS and REQUEST<sup>2</sup> data extracted from the ORMF), variables produced especially for presentation in the tabulation volumes, and editing/logic variables. The codebook documents the data files by providing the physical locations and labels for all variables. Frequency distributions based on sample counts are also provided. Variable crosswalks are presented at the bottom of each codebook page to identify the location of the survey item across the various 1984 NRS Survey forms, as well as across the three ARI Enlistment Decision Surveys (more commonly referred to as the "MEPS" and "MEPS Followup" Surveys). In addition, each codebook page indicates whether or not the 1984 NRS survey item was included in the 1982 and 1983 instruments and, if so, whether or not the current wording of the question differs from earlier versions.

---

<sup>2</sup>The acronyms MEPRS and REQUEST stand for the Military Entrance Processing Reporting System and Recruit Quota System, respectively. The MEPRS data system contains information about DoD personnel being voluntarily processed into a branch of the Armed Forces; the system is documented in MEPCOM Regulation 18-5. REQUEST is the Army's data system used to record information about enlistees into one of the Army components (Regular Army, Army Reserves, and Army National Guard). The REQUEST system is documented in Army Regulation (AR) 601-210.

## Codebook Contents and Conventions

Codebook pages contain considerable descriptive information as well as the file location of each variable. The information provided includes: codebook title, variable name, statement of the original survey question (if applicable), item location on the OS and SAS data files, response values, response frequency and percent distribution, extended value labels, and survey item crosswalks.

Order of Variable Presentation. Variables appear in the codebook in the same order in which they are presented on the 1984 Winter NRS RA database. The first several variables presented are the case ID, the reception station where the survey was administered, the survey form, and the case ID assigned by the optical scanning company, INTRAN. Survey items are presented next, followed by logic variables, recoded survey variables used in the tabulations, count variables (i.e., variables which count the number of responses checked across "mark all that apply" questions), response error variables, variables extracted from the ORMF, and finally, crossing variables for use in tabular analyses.

Variable Naming Conventions. The process of naming NRS variables proceeded as follows:

- Survey administration/background demographic variables were given short descriptive names, e.g., the Westat respondent identification number was called "ID", the survey form was called "FORM", respondent sex was named "RSEX", and so on.
- Original versions of survey items were assigned sequential numbers preceded by the letter "T". Thus, the first survey item was named "T001"; the second question was given the variable name "T002", and so on. There were some exceptions to this naming convention: three survey items were given short descriptive names, for example the variable name "ZIP" was used to label zipcode of teenage household; in addition, four related survey items pertaining to school/work status at time of contract were given "T" numbers followed by the letters "S" or "W" to distinguish whether the item was school or work-related.
- Survey items which had been developed in previous ARI surveys (i.e., the New Recruits Surveys or the MEPS/MEPS Followup Surveys) were given the same Test number designator (T###) as originally provided in the 1982 or 1983 ARI NRS data files.

- Logic variables were of two types: level 1 and level 2. The level 1 logic variables checked the serial list questions ("mark all that apply") for out-of-range values. The level 2 logic variables compared response values across similar or related survey items for consistency of answers. Level 1 logic variable names began with "L1" and level 2 logic variable names began with "L2"; in some instances the next character was an alphabet letter. Presence of a letter indicated that there were several related logic variables which checked the consistency of a particular survey item with other survey items. The next character in the logic variable name was an underscore (\_) followed by the original variable name. Thus, a logic variable name may look like this: L2A\_T001.
- Recoded survey variables were given names that began with the letter "R" followed by the original variable name. There were only three recoded survey items: "WKSLOOK" and "WKSWORK" were recoded to develop the variables "RWKSLOOK" and "RWKSWORK". The third variable recode was an exception to the naming convention; "ZIP" was recoded to develop "RBRIGADE".
- Count variables were named with the prefix, "CNT\_", followed by the variable name that corresponded to the "mark all that apply" question. For example, the variable which counts the number of items checked on variables T110A-T110I, is named CNT\_T110.
- Response error variables were given the names: MISSDOT, MISSA, MISSB, MISSLOG, and MISSTOT. This naming convention was based on the method of variable construction which produced counts of the numbers of missing value codes across respondents which were represented by the symbols: "." (dot), "A", and "B". MISSLOG and MISSTOT represented the number of "missed" or failed logic checks and the total of all the missed" responses, respectively.
- Variables derived from the ORMF (MEPRS and REQUEST) were given short descriptive names, e.g., recruiting battalion = BN.
- Crossing variables were given short descriptive names preceded by the letter "X", e.g., sex = XSEX.

Variable Labels. Codebook entries for 1984 NRS survey items include the statement of the actual question as presented in the survey instrument. Slight rewording of the questions was sometimes necessary to aid the reader. Recoded versions of survey items also present the NRS question, preceded by the word

"recoded." Variables which were not taken from NRS survey items have explanatory labels in place of the question statement.

Descriptive Variable Information. All codebook entries include information directing the user to the variable's location on both the OS and SAS data files. Response alternatives are listed and labeled for each variable. With a few exceptions, information is provided on the distribution (numbers and percentage) of answers across variable values. For some variables, this information is not provided due to continuous data points (as in listings of zipcodes or favorite TV programs). In such cases, whenever possible, footnotes are included to provide the range of values obtained.

Footnotes. Footnotes are included on some codebook pages to provide notations of interest to data analysts. Three different types of footnotes were included to provide one or more of the following items of information: (1) notation that the distribution of responses could not be presented in a codebook table; (2) the range of values obtained (if not reported in a frequency table); and/or (3) the names of logic variables which were created to examine the survey item's response consistency with related questions. Some variables required multiple footnotes. For variables in which none of the above conditions were met, no footnotes appear.

Survey Item Crosswalks. Codebook pages documenting 1984 NRS survey items and background demographics collected on the NRS answer sheet contain survey item crosswalk tables on the bottom portion of the pages. The first table lists the four form types for the 1984 NRS instrument, i.e., form types A-D. The table cells indicate whether or not the question was included on that particular survey form. The cell is left blank if the question did not appear on the survey instrument. If the survey item was included on the instrument, this was indicated by printing the question number of the item as it originally appeared in the instrument in the cell. The most common format of the question number was a "Q" followed by three numbers; if the question appeared in the background section of the survey (and thus had no question number), the letter "A" was printed with a number indicating the approximate sequence of the question in the section.

A little further to the right is a table crosswalking the appearance of 1984 NRS questions on the 1982 and 1983 surveys. The two cells are labeled "1982" and "1983". The word "YES" appears in the cell when the 1984 question was also included on the earlier versions of the NRS. The letters "NA" (not applicable) appears in the cells when the variable did not appear in the earlier NRS instruments. Differences in question wording between the 1984 items and earlier versions of the survey are indicated by: (1) an asterisk for differences between 1984 and 1982, and

(2) a plus sign for differences between the 1984 and 1983 instruments. In addition, the phrase "WORDING DIFFERS" is printed under the table. If the question wording differs only on Form D of earlier NRS instruments, then the phrase "DIFFERS (FORM D)" is printed.

The second set of tables labeled "MEPS," crosswalk the NRS item with questions on each of three forms of the ARI Enlistment Decision Surveys (MEPS and MEPS Followup Surveys). Again, the presence of a question number (Q###, or if the question was labeled with a letter [A-E] then, for example, A001 is printed) indicates where the survey item appeared on the MEPS survey instrument. An empty cell indicates that the NRS question did not appear on the MEPS instrument.

Codebook Pagination. Codebook pages are numbered sequentially preceded by the number "4" indicating Chapter 4 of the report.

#### Example of a Codebook Page

Figure 1 provides an example of a codebook page for an NRS survey item. The numeric indicators for Figure 1 are identified and their referents described on subsequent pages.

Missing Value Codes. The following five missing value codes were imputed during preliminary processing of the NRS to indicate the occurrence of specific conditions in the data.

- The code "." (dot) was used to indicate the lack of a response to a particular survey item.
- The code "A" indicated the presence of more than one response to a question requesting a single answer (e.g., a response indicating gender as being both male and female).
- The code "B" was used when a response fell outside the range of response alternatives provided, e.g., selection of response "E" on the answer sheet when only "A", "B", and "C" were valid. Code "B" was also used in situations in which uninterpretable responses or comments irrelevant to the question were the only answers provided to the question.

## EXPLANATION OF FIGURE 1

### CONTENTS OF A CODEBOOK PAGE FOR AN NRS SURVEY ITEM

- 1 Codebook title.
- 2 Variable name.
- 3 Statement of survey item as it appears on the questionnaire. The word, "recoded" precedes the statement of the question for recoded survey items. A descriptive label is provided for variables which are not survey items.
- 4 Description of the location, i.e., card number, column number, and length of survey item on the OS data file.
- 5 Position of the variable on the SAS data file.
- 6 Counts of responses across response values.
- 7 Percentage of total responses represented by each value.
- 8 Actual (or recoded) response values.
- 9 Explanation of the response value code. Special codes were used to denote the various types of missing values.
- 10 Total of response frequencies and percents.
- 11 Special notations pertinent to the variable.
- 12 Crosswalk of survey item across all survey forms of the 1984 NRS.
- 13 Indicator of 1984 NRS item appearance in previous NRS administrations.<sup>2</sup>
- 14 Crosswalk of survey item across all survey forms of the MEPS/MEPS Followup Survey.

---

<sup>1</sup> Special missing value codes were devised to ensure consistency across survey forms. Derived values (i.e., ".", "A", "B", and "D") were developed to denote missing values, multiple response errors, out-of-range values, and absence of item on survey form.

<sup>2</sup> "NA" indicates the item did not appear in that survey year. "Yes" indicates the item's appearance on at least one of the survey forms. "\*" indicates a wording change between how the item text appears in the 1984 instrument and how it appears in the survey questionnaire(s) of 1982; a "+" indicates differences in item wording between the 1984 and 1983 NRS.

- The value "D" was developed to identify those respondents who did not have a particular question on the form of the survey instrument they completed; since multiple forms of the instrument were used, not all questions were asked of all Regular Army respondents.
- Code "G" (or "~" for character data) was developed as an indicator of a no-match between a survey respondent and the ORMF file.

In general, the ability to distinguish between the different kinds of missing values provides the data analyst with opportunities for exploring problems which specific questions posed for various types of respondents. Similarly, it permitted the calculation of several different data quality indicators (see next section) across all survey respondents: MISSDOT (extent of missing data); MISSA (frequency of multiple response errors); MISSB (frequency of out-of-range responses); MISSLOG (sum of level 2 logic failures); and, MISSTOT (sum of all types of response errors).

The SAS and OS data files do not share the same codes for missing data values. Table 1 crosswalks the SAS special value codes presented in the preceding discussion to OS format.

Table 1  
Crosswalk of Winter 1984 NRS Missing Value Codes  
from SAS to OS Format

<u>Value Designation</u>		Value Description
SAS File	OS File	
.	-9	No response
A	-8	Multiple response error (single response requested)
B	-7	Out-of-range response
D	-5	Question does not appear on survey instrument form
G, ~	-3, ~	No match on MEPRS/REQUEST (ORMF)

### Use of Codebook Index

The codebook index, pages 44-53, presents a table of contents for codebook entries. The index provides three pieces of information for each codebook entry listed: variable name, variable label, and page number. An example of the index is shown below:

#### CODEBOOK INDEX FOR THE WINTER 1984 ARI SURVEY OF ACTIVE ARMY SURVEY RESPONDENTS

VARIABLE NAME	LABEL	PAGE
ID	SOCIAL SECURITY NUMBER	001
STATION	STATION WHERE SURVEY WAS TAKEN	002
FORM	SURVEY FORM	003
INTRAN	INTRAN PROCESS ID	004
SDAY	DAY OF INTERVIEW	005-006
SMO	MONTH OF INTERVIEW	007
SYEAR	YEAR OF INTERVIEW	008
RSEX	SELF-REPORTED GENDER	009
ETHNIC	ETHNIC GROUP	010
COLLED	COLLEGE EDUCATION	011
HSED	HIGH SCHOOL EDUCATION	012
HSYEAR	YEAR GRAD. OR LAST YEAR IN HIGH SCHOOL	013
TVSHOW	NAME OF YOUR FAVORITE EVENING TV PROGRAM	014
B178	HOUSEHOLD GROSS INCOME (FORCED CHOICE)	015
T001	EXPECTED SATISFACTION WITH ARMY LIFE	016
T004	AFFECT BY A RECRUITER AIDE	017
T010	AFFECT BY INFO IN AN ARMY RADIO AD	018

The index listing for each codebook entry is presented in the same sequence as the variables appear on the SAS dataset for Regular Army respondents to the Winter 1984 NRS. Survey administration variables and respondent demographics are presented first, followed by survey items.

Following presentation of these variables, the index lists logic variables (levels 1 and 2), recoded survey variables, count (CNT\_) variables for serial list items, response error variables, ORMF-derived variables, and finally, crossing variables.

The index should be used as one would use a table of contents to locate the codebook entries of particular variables.

PLATE

## SPECIAL VARIABLE SELECTION AND CREATION PROCEDURES

This chapter documents variables which are included on the survey database but which did not appear as survey items on the 1984 Winter NRS. There are six different types of these "special" variables:

- Count Variables - New variables were created to record the number of items checked for each of the serial list questions which asked respondents to mark all applicable categories.
- Logic Variables - Numerous variables were created to check the logical consistency of responses within the serial list questions as well as across related survey items.
- Response Error Variables - Five variables were created to compute the frequency of response errors (e.g., out-of-range responses, missing data).
- Recoded Survey Items - Recoded versions of selected survey items were created for presentation in the tabulation volumes.
- ORMF/ORMF-Derived Variables - Several variables were either taken directly or were created using ORMF data for inclusion on the NRS data files. Many of these variables were reformatted for use as crossing variables in the tabulation volumes.
- Crossing Variables - Ten crossing variables were created for use in tabular analyses of the RA data using variables taken or derived from the ORMF as well as recoded survey items.

Each of the six types of special variables is described in a separate subsection of this chapter.

### Count Variables

The 1984 NRS instrument for the RA component contained 21 serial list questions. These questions asked respondents to mark all applicable responses in a list. For example, one question (T198A - T198J) asked respondents to indicate, for a list of subjects, which courses they had taken and passed in high school. A "count" variable was developed which computed the number of items in that list which were checked off by the respondent. Twenty-one count variables were developed corresponding to the twenty-one sets of serial list questions. The twenty-one sets of

serial list questions are printed below with their respective count variables.

<u>Serial List Question Sets</u>	<u>Count Variables</u>
T110A - T110I -----	CNT_T110
T111A - T111I -----	CNT_T111
T112A - T112I -----	CNT_T112
T113A - T113I -----	CNT_T113
T114A - T114I -----	CNT_T114
T115A - T115C -----	CNT_T115
T116C - T116I -----	CNT_T116
T117C - T117I -----	CNT_T117
T118B - T118H -----	CNT_T118
T119B - T119C -----	CNT_T119
T157B - T157J -----	CNT_T157
T176A - T176I -----	CNT_T176
T198A - T198I -----	CNT_T198
T221A - T221E -----	CNT_T221
T222A - T222E -----	CNT_T222
T232A - T232F -----	CNT_T232
T233A - T233F -----	CNT_T233
T361A - T361I -----	CNT_T361
T362A - T362I -----	CNT_T362
T363A - T363I -----	CNT_T363
T364A - T364J -----	CNT_T364

Internal Serial List Item Consistency. Analysts should be aware that one or two of the response categories in each serial list question (with the exception of T364) was inconsistent with the other answers. For example, the last response category in a serial list question requesting respondents to "mark all that apply" might read "none of the above." Respondents who marked this final category and any other category in this series would be classified as having made a "multiple response error." In order to preserve as much data as possible, the special missing value code "A" was specified only in the "inconsistent" value category. The "inconsistent" value categories for the serial list questions in the 1984 NRS include the following:

T110J	T115D	T157A	T232G
T111J	T116A	T176J	T233G
T112J	T117A	T198J	T361J
T113J	T118A	T221F	T362J
T114J	T119A	T222F	T363J

### Logic Variables

There were two levels of data editing performed on the 1984 NRS: (1) checking for valid value ranges and internal item consistency (see previous subsection), and (2) comparing the consistency of responses to related or similar survey items. A series of logic variables was developed based upon the outcomes of this dual-stage editing process.

Level 1 editing was performed on all survey items to check for valid value ranges. Responses that were erroneous or inapplicable were typically assigned a missing value code (see Table 1 on page 14). However, serial list (i.e., "mark all that apply") questions, which allow for more than one possible response, necessitated the creation of level 1 logic variables. Each potential response in the serial list questions was treated as a separate dichotomous variable (i.e., two values were possible: "1=Checked", and "2=Not Checked"). Since each response category was used to create an individual variable, it became impossible to ascertain when respondents had selected response codes (on the survey answer sheet) that were out-of-range for the question overall. Thus, the level 1 logic variables were created to check for out-of-range values across each of the serial list question sets. Only 9 of the serial list question sets had fewer than 10 response values, thus allowing for the possibility of an out-of-range value (the answer sheets allowed for 10 responses per question). The 9 sets of serial list questions are printed below with their corresponding level 1 logic variables.

<u>Serial List Question Sets</u>	<u>Level 1 Logic Variables</u>
<u>Checked for Out-Of-Range Values</u>	
T115 (A-D)	L1_T115
T116 (A-I)	L1_T116
T117 (A-I)	L1_T117
T118 (A-H)	L1_T118
T119 (A-D)	L1_T119
T221 (A-F)	L1_T221
T222 (A-F)	L1_T222
T232 (A-G)	L1_T232
T233 (A-G)	L1_T233

Level 2 editing was also performed on the 1984 Winter NRS data. This editing stage involved comparing individual responses among related survey items which were expected to have similar answers.

When responses to a group of related survey items were found to be inconsistent, the value "1" was assigned to a corresponding logic variable. For example, a respondent who indicated that s/he did not remember signing up for a job which pays a cash enlistment bonus (T066 = 12 or 13) should have answered "does not

apply to me" in subsequent questions related to receipt of a bonus (T067 and T068=1). However, some of these respondents did not select the response "does not apply to me" and went on to provide specific answers to T067 and T068. The identification of such a logical inconsistency would be recorded in the logic variable L2A\_T066.

In some instances, logic variables checked only one variable against one other variable. In other instances, as in the above example, the response consistency among a series of related variables was checked and the results recorded in a single logic variable. Survey items on which internal consistency checks were performed identify the pertinent logic variable name(s) in a footnote on the codebook page.

Table 2 lists and briefly describes each of the logic variables created to evaluate the internal consistency of survey responses. Codebook entries for the logic variables are presented on pages 4-433 to 4-474.

#### Response Error Variables

The 1984 Winter NRS was a self-administered survey. The surveys were conducted in group settings at Army reception stations. The conditions of survey administration would lead one to expect some data problems since respondents taking the survey in large groups may not have asked for help in interpreting directions or clarifying the meaning of certain survey items. In addition, the survey administrators were not involved in the instrument design phase of the project, and thus may not have been able to provide appropriate explanations or clarification regarding question interpretation in response to questions occurring during survey administrations. The 1974 Privacy Act was printed on the outside cover of each survey. The Privacy Act emphasizes the voluntary nature of answering the survey and any particular survey items. Thus, it is possible that respondents simply skipped over survey items or even sections that they did not wish to complete.

Given these possible sources of faulty data, a series of variables was created to provide an accounting of respondent reliability. Four variables were developed to calculate the occurrence of survey item response errors for each survey respondent. The four types of response errors and their respective variable names are: (1) missing data - MISSDOT; (2) out-of-range responses - MISSB; (3) multiple responses provided when a single response was required - MISSA; and (4) logic failures - MISSLOG. A fifth variable, MISSTOT, summed all four response error counts to provide an overall measure of respondent reliability. The frequency distributions for each of these variables are presented in the codebook, pages 4-499 to 4-511.

**Table 2**  
**Descriptions of 1984 Winter NRS Logic Variables**  
**(RA Component)**

Logic Variable Name	Description
L2_HSED	If you did not receive either a high school diploma or a GED for your high school education (HSED=3), then your college education, as reported in COLLED, should be "none" (COLLED=1).
L2_WEEKS	The number of weeks worked during the past year (WKSWORK) plus the number of weeks you were not working but were looking for work (WKSLOOK), cannot be greater than 52.
L2A_T031	The Army can only be chosen once across variables T031-T034.
L2B_T031	The Air Force can only be chosen once across variables T031-T034.
L2C_T031	The Navy can only be chosen once across variables T031-T034.
L2D_T031	The Marines can only be chosen once across variables T031-T034.
L2A_T115	If you responded to an Army advertisement by sending in a card (T115A=1), then what you received should be specified in T116 (T116B,C,D,E,F,G,H, and/or I=1).
L2B_T115	If you did not respond to an Army advertisement by sending in a card (T115A NE 1), then you should have specified 'I never sent a card in response to an Army ad' in T116 (T116A=1).
L2C_T115	If you did not respond to any Army advertisement (T115D=1), then you should have specified 'I never sent a card in response to an Army ad' in T116 (T116A=1), 'I never called a toll-free number in response to an Army ad' in T117 (T117A=1), and 'I never received any of this material in response to a toll-free call or card' in T118 (T118A=1) and T119 (T119A=1).
L2D_T115	If you responded to an Army advertisement by calling a toll-free number (T115B=1), then what you received should be specified in T117 (T117B,C,D,E,F,G,H, and/or I=1).
L2A_T059	If you did not sign up or don't know if you signed up for a job that pays an ACF extra educational benefit at the end of your first enlistment (T059=1 or T059=2), then you should have specified 'Does not apply to me, I am not getting an ACF extra education bonus' in T060 (T060=1) and T061 (T061=1).
L2B_T059	If you signed up for and received a job that pays an ACF extra educational benefit at the end of your first enlistment (T059=3,4,5,6,7,8,9 or 10), then you should not have specified 'Does not apply to me, I am not getting an ACF extra education bonus' in T060 (T060 NE 1) and T061 (T061 NE 1).
L2A_T064	If you signed up for a 3 or 4 year term of enlistment (T064=1), then you should have specified 'Does not apply to me, I enlisted for 3 or 4 years' in T065 (T065=1), and vice versa.
L2A_T066	If you did not sign up for a job which pays a cash enlistment bonus or don't know if you received a bonus (T066=12 or 13), then you should have specified 'Does not apply to me, I am not getting a cash enlistment bonus' in T067 (T067=1) and T068 (T068=1).
L2B_T066	If you signed up for a job which pays a cash bonus and specified the amount of your cash bonus (T066=23,24,25,26,27,28,29,30,34, or 35), then you should not have specified 'Does not apply to me, I am not getting a cash enlistment bonus' in T067 (T067 NE 1) and T068 (T068 NE 1).

Table 2. (continued)

Logic Variable Name	Description
L2_T366	If you were not in the DEP (T366S=4 or T366W=5), then you should have specified 'Does not apply, I was not in the DEP' in T367 (T367=10), T368 (T368=10), and T369 (T369=10).
L2_T367	If you were not in the DEP (T367=10), then you should have specified 'Does not apply, I was not in the DEP' in T366S (T366S=4), T366W (T366W=5), T368 (T368=10), and T369 (T369=10).
L2_T368	If you were not in the DEP (T368=10), then you should have specified 'Does not apply, I was not in the DEP' in T366S (T366S=4), T366W (T366W=5), T367 (T367=10), and T369 (T369=10).
L2_T369	If you were not in the DEP (T369=10), then you should have specified 'Does not apply, I was not in the DEP' in T366S (T366S=4), T366W (T366W=5), T367 (T367=10), and T368 (T368=10).
L2A_T211	If you had not worked for pay before joining the Army (T211=45), then you should have specified 'I had not worked for pay before joining the Army' in T278 (T278=1) and either 'Not working but looking for work' or 'Not working and not looking for work' in T279W (T279W=3 or 4).
L2A_T118	If you appreciated receiving a 'letter telling me location of Army recruiting station' (T118B=1), then you should have specified that you received a letter in T116 (T116C=1) or T117 (T117C=1).
L2B_T118	If you appreciated having 'a gift like tube socks or wrist bands' (T118C=1), then you should have specified that you received that gift in T116 (T116D=1) or T117 (T117D=1).
L2C_T118	If you appreciated having 'a poster' (T118D=1), then you should have specified that you received a poster in T116 (T116E=1) or T117 (T117E=1).
L2D_T118	If you appreciated having a 'booklet about Army service' (T118E=1), then you should have specified that you received that booklet in T116 (T116F=1) or T117 (T117F=1).
L2E_T118	If you appreciated having a 'booklet about Army College Fund' (T118F=1), then you should have specified that you received that booklet in T116 (T116G=1) or T117 (T117G=1).
L2F_T118	If you appreciated having 'a bumper sticker' (T118G=1), then you should have specified that you received a bumper sticker in T116 (T116H=1) or T117 (T117H=1).
L2G_T118	If you appreciated having 'Army bookcovers' (T118H=1), then you should have specified that that you received bookcovers in T116 (T116I=1) or T117 (T117I=1).
L2A_T119	If a booklet about Army service helped you decide to enlist in the Army (T119B=1), then you should have specified that you received a booklet in T116 (T116F=1) or T117 (T117F=1).
L2B_T119	If a booklet about the Army College Fund helped you decide to enlist in the Army (T119C=1), then you should have specified that you received a booklet in T116 (T116G=1) or T117 (T117G=1).
L2_T221	If you don't regularly listen to the radio during the week (T221F=1), then T221A-T221E should have been skipped (T221A-T221E=0).
L2_T222	If you don't regularly listen to the radio during the weekend (T222F=1), then T222A-T222E should have been skipped (T222A-T222E=0).
L2_T049	If you specified 'I do not know what job I signed up for' in T049 (T049=1), then you should have specified the same reply to T050 (T050=1), and vice-versa.
L2_T060	If you specified 'Does not apply to me, I am not getting an ACF extra education bonus' in T060 (T060=1), then you should have specified the same reply to T061 (T061=1), and vice-versa.

### Recoded Survey Items

New versions of three 1984 NRS items were created in order to enhance their presentation in the tabulations. Recoded versions of original survey items were developed in order to: (1) regroup response alternatives so as to reduce the original number of answer categories; and (2) to construct crossing variables. The three variables recoded for tabular analyses are treated below in Tables 3 and 4. Crossing variables are discussed in the next section of this chapter.

Table 3 lists the question number, variable names, and recoded variable names for each of the survey items that were reformatted for tabular analyses of the Winter data. This is followed by Table 4 which documents the regrouping and collapsing of original variable values and labels into the recoded values.

Table 3

#### Recoded Variables with Regrouped Response Alternatives for Tabular Analyses

Survey Item*	Variable Name	Recoded Variable
A003	WKSWORK	RWKSWORK
A004	WKSLOOK	RWKSLOOK
A002	ZIP	RBRIGADE

\*Question numbers preceded by the letter "A" indicate that the question was presented in the background section of the survey, and thus did not have question numbers. The number provided after the "A" indicates the approximate sequence of item presentation in the background section of the survey.

### ORMF/ORMF-Derived Variables

Fifteen variables were taken directly or were created using data from the ORMF for merging with the NRS data files. Many of these variables were subsequently reformatted for use as crossing variables in the tabulation volumes. This section presents a series of tables (Table 5) documenting the merged variables' original formats as presented on the ORMF (MEPRS and REQUEST formats are both provided where applicable) and the variables' formats and labeling as they appear on the SAS database.

	.		Brigade		5 = SW
	.		(Region).		
	.				
	99999				

In some instances, the original ORMF variable values were simply regrouped or collapsed into a smaller number of response categories. In other instances, multiple MEPRS and REQUEST variables were used to create a single new SAS variable. When several different ORMF variables were used to create a new SAS variable, the original MEPRS/REQUEST variables are included in the same table with the derived SAS variable; explanations of the variable creation are also provided in the table itself.

Table 5 lays out the values of the SAS variables (always located in the right-most column) adjacent to the original values of the MEPRS/REQUEST variable for ease in interpreting the regrouping and relabeling of value categories. When this was not possible, special notations are included on the table. Table 6 in the next section of this chapter documents any further transformation of the SAS versions of the merged variables to create crossing variables.

### Crossing Variables

Twelve crossing variables were created for tabular analyses of the 1984 Summer NRS data for the RA component. The same crossing variables were constructed for the 1984 Winter NRS database. Thus, data analysts can easily produce tables comparable to the Summer 1984 tabulation volumes using 1984 Winter data. Three of the twelve crossing variables are versions of the AFQT category variable using different norming conventions. Every NRS respondent for whom AFQT was available (from MEPRS/REQUEST) was given an MCAT variable. Depending on the form of the AFQT administered to the respondent, the MCAT variable was renormed using either the 1944 WW2 test norms (TESTID=1-4) or the 1980 youth norms (TESTID=0 or  $\geq 5$ ). All three versions of the AFQT category variable (i.e., MCAT, MCAT80, and MCAT44) are included on the 1984 Winter NRS database, thus allowing comparable analyses with the 1984 Summer NRS databases.

No official volume of tabulations were produced for the Winter NRS. A two-volume set of tabulations were produced for the RA and the USAR respondents to the Summer NRS. A single tabulation volume using five crossing variables was produced for the ARNG. Volume 1 in the RA tabular descriptions presents tables of 1984 Summer NRS survey responses (on Forms A, B, and C) crossed by respondent gender, highest level of education, AFQT category (GM<sup>4</sup> responses only), year of high school diploma (for high school diploma graduates and post-high school graduates only), and ethnic group. Volume 2 crossing variables include term of

---

<sup>4</sup>GM refers to male, high school diploma graduates and post-high school graduates.

enlistment (GMA<sup>5</sup> responses only), eligibility for ACF/cash incentives (GMA responses only), recruiting region, rural/urban nature of preenlistment residence, and age at DEP contracting. Two of the crossing variables are based upon survey items. The other eight crossing variables were derived from OPMF data elements.

The survey items, HSYEAR and T187, were used as crossing variables in the 1984 Summer NRS tabulations. The original variable values were regrouped prior to inclusion in the tabulations as shown below:

<u>Survey Item</u>				<u>Crossing Variable</u>	<u>Values and Labels</u>
	<u>Form A</u>	<u>Form B</u>	<u>Form C</u>		
HSYEAR	A005	A005	A005	XHSYEAR (Year of HSDG) (Selecting respondents with XEDLEVEL=1 or 2)	1 = 1984 2 = Earlier
T187	Q062	Q058	Q115	XRURURB (Rural/urban nature of preenlistment residence)	1 = LG_CITY 2 = MED_CITY 3 = SUBURB 4 = TOWN 5 = RURAL/FARM

The remaining eight crossing variables were created using ORMF data. In some instances, crossing variables were taken directly as they had appeared on both files which comprise the ORMF, e.g., the SAS variable SEX is the equivalent of the MEPRS variable, MSEX and the REQUEST variable, RSEX. In other instances, the values of ORMF variables were regrouped or were combined with other ORMF variables to create the crossing variable. Table 5, which was discussed earlier in this chapter, documents the original ORMF variables which were used to produce SAS versions of the ORMF variables. Table 6 documents the transformation of these SAS data elements and two NRS items into crossing variables. The values presented in Table 6 report the legitimate or allowable ranges, not the actual values reported. Actual frequency counts are reported on the codebook pages documenting the crossing variables.

---

<sup>5</sup>GMA refers to male, high school diploma graduates and post-high school graduates in AFQT categories 1-3A.

SAS Variable: AGEATCON Age at Time of DEP  $((MDEPDT - MDOB) \div 365.25) / ((MDEPDT - RDOB) \div 365.25)$  as Reported on MEPRS/REQUEST\*

ORIGINAL FORMAT		RECODED FORMAT		
SAS Variable Name	Original Values and Labels	Crossing Variable Name	Regrouping of Original Values	Collapsed Values/Labels
AGEATCON	16 . . . 37	XAGECON	17 18 19 20 - 24 25 - 34 (16, 35 - 37)	1 = 17 2 = 18 3 = 19 4 = 20 - 24 5 = 25 - 34 (Missing/ out-of-range)

Crossing Variable: XMCAT80 Crossing Variable - Mental Category of Male HSDG/Post (1985 Renorming/1980 Youth Norms)

SAS Variable: MCAT80 Mental Category [1985 Renorming/1980 Youth Norms] (MAFQT/RAFQT) as Reported on MEPRS/REQUEST\*

ORIGINAL FORMAT		RECODED FORMAT		
SAS Variable Name	Original Values and Labels	Crossing Variable Name	Regrouping of Original Values	Collapsed Values/Labels
MCAT80	1 = 4C,5 2 = 4B 3 = 4A 4 = 3B 5 = 3A 6 = 2 7 = 1	XMCAT80 <sup>1</sup>	3,2 4 5 6,7 (1)	1 = 4 2 = 3B 3 = 3A 4 = 1 & 2 (Missing/ out-of-range)
		<sup>1</sup> The only respondents selected were HSDG or post-HS graduate males (XEDLEV=1 or 2 & SEX=1).		

\*The source for the MEPRS/REQUEST data elements was the Operations Reporting Master File (ORMF).

Table 6. (continued)

Crossing Variable: XACFCEB Crossing Variable - ACF/Cash Incentives of Male I-III A HSDG/Post Respondents

SAS Variables: CASHBON Cash Bonus and ACFKICK ACF Bonus (RAOPT) as Reported on REQUEST\*

ORIGINAL FORMAT		RECODED FORMAT		
SAS Variable Name	Original Values and Labels	Crossing Variable Name	Regrouping of Original Values	Collapsed Values/Labels
CASHBON	0 = Did not receive cash bonus or MEPRS, REQUEST field blank 1 = Received cash bonus	XACFCEB <sup>1</sup>	CASHBON = 0 & ACFKICK = 0	1 = Neither
			CASHBON = 1 & ACFKICK = 0	2 = Bonus
			CASHBON = 1 & ACFKICK = 1	3 = Both
			CASHBON = 0 & ACFKICK = 1	4 = ACF
ACFKICK	0 = Not eligible for ACF or MEPRS/REQUEST field blank 1 = Eligible for ACF	<sup>1</sup> The only respondents selected were I-III A, HSDG or post-HS graduate males (MCAT80=5,6, or 7 & XEDLEV=1 or 2 & SEX=1).		

Crossing Variable: XRURURB Crossing Variable - Rural/Urban

SAS Variable: T187 Which of these best describes the place where you were living when you enlisted?

ORIGINAL FORMAT		RECODED FORMAT		
SAS Variable Name	Original Values and Labels	Crossing Variable Name	Regrouping of Original Values	Collapsed Values/Labels
T187	1 = In a large city (Over 250,000 people) 2 = In a suburb of a large city 3 = In a medium-sized city (50,000 - 250,000 people) 4 = In a suburb of a medium-sized city 5 = In a small city or town (Under 50,000 people) 6 = In a rural area, but not on a farm or ranch 7 = On a farm or ranch	XRURURB	1	1 = Lg_city
			3	2 = Med_city
			2,4	3 = Suburb
			5	4 = Town
			6,7	5 = Rural/Farm

\*The source for the MEPRS/REQUEST data elements was the Operations Reporting Master File (ORMF).

THE 1984 ARI SURVEY OF ARMY RECRUITS:  
CODEBOOK FOR OCTOBER 84/FEBRUARY 85 ACTIVE ARMY SURVEY RESPONDENTS

The data presented on the following pages summarize the attitudes of the Army recruits who responded in this research effort. They do not necessarily represent the actual percentages that would have been obtained had the entire population of new Army recruits been surveyed during the survey quarters of interest or across the entire fiscal year.

THE 1984 ARI SURVEY OF ARMY RECRUITS:  
CODEBOOK FOR OCTOBER 84/FEBRUARY 85 ACTIVE ARMY SURVEY RESPONDENTS

ID - SOCIAL SECURITY NUMBER

RAW DATA

CARD #	COLS	LENGTH
ALL	001-009	9

SAS DATASET POSITION	1
-------------------------	---

VALUE RANGES: 0000000001-0599999999.

ALL RESPONDENTS' SOCIAL SECURITY NUMBERS WERE SET TO A MISSING VALUE CODE (.U)  
TO PRESERVE CONFIDENTIALITY ON THE PUBLIC USE DATA TAPES.

THE 1984 ARI SURVEY OF ARMY RECRUITS:  
CODEBOOK FOR OCTOBER 84/FEBRUARY 85 ACTIVE ARMY SURVEY RESPONDENTS

STATION - RECEPTION STATION WHERE SURVEY WAS ADMINISTERED

THE 1984 ARI SURVEY OF ARMY RECRUITS:  
CODEBOOK FOR OCTOBER 84/FEBRUARY 85 ACTIVE ARMY SURVEY RESPONDENTS

B178 - THIS QUESTION IS ABOUT YOUR PARENTS HOUSEHOLD OR THE HOUSEHOLD YOU GREW UP IN. ANSWER THIS QUESTION ABOUT THE HOUSEHOLD THAT YOU MARKED THE ZIPCODE FOR ON THIS ANSWER SHEET. WHAT WOULD YOU SAY IS THE TOTAL YEARLY INCOME OF YOUR PARENTS OR GUARDIANS AND ALL FAMILY MEMBERS WHO LIVE WITH THEM, BEFORE TAXES AND OTHER DEDUCTIONS? DO NOT INCLUDE YOUR INCOME. GIVE YOUR BEST ESTIMATE.
